Bank App Project — Streamlit & Python

■ **Bank App Project — Built with Streamlit & Python** I'm excited to share my latest project — **Bank App**, a web-based application developed using **Python** and **Streamlit**. This project demonstrates my skills in: - ■ Python programming - ■ Streamlit framework - ■ Data handling and state management - ■ User Interface design The app allows users to **create accounts, log in, manage balance, and perform transactions** — all through a simple, interactive web interface. ■ **Live Demo:** https://bankapp-fguat4men5j8dnoappg3x2q.streamlit.app ■ **GitHub Repo:** https://github.com/YOUR_GITHUB_USERNAME/Bank_app This project represents my progress as I continue learning **Python**, **AI**, and **Machine Learning**, focusing on building practical, real-world applications. #Python #Streamlit #WebApp #AI #MachineLearning #CodingJourney #Portfolio #Innovation
